

(15) PETROSPORT RECREATIONAL VILLAGE - EGYPT (2012) – Innovative Architecture Buildings

The village owner is PETROSPOT Company affiliated to Egyptian oil sector. The village enjoys the great environment of NEW BORG AL ARAB CITY at south west of Alexandria. The project components are; hotel, villas, chalets, administration building, club houses, conference center, large recreational area and large size swimming pools. The design includes; structure, water and sewage systems, electromechanical systems for all project elements. Buildings are all having large spans innovative / complex architecture designs. The village with multilevel landscape necessitated the use of earth retaining structures of block walls and reinforced concrete walls with various heights, shapes and dimensions.
